Layer Name: Aerial NOAA – Hosted by Telascience

For information:
http://oceanservice.noaa.gov/news/features/may10/ngs-deepwater.html

NOAA acquired digital aerial photographs using the parameters below:

> Altitude: 7500 ft
> ortho GSD: 0.35 m
> Camera: Applanix DSS 439 medium format digital camera with a 4-band ortho-imager
> (RGB & NIR sensors)
> Platform: NOAA King Air 350ER

This site is using a WMS data feed from Telascience.

The original NOAA imagery, with full flight-specific metadata, is archived on the USGS Hazards
Data Distribution System (HDDS):
